SeisFrame automated structural design

Explore options. Test performance. Make engineering-guided changes.

Changed members Higher grade

01 Define the building

Building layout

Bays · spans · stories

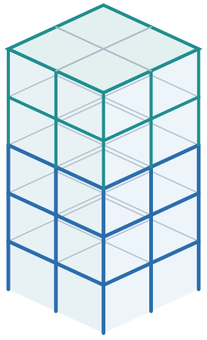

Gravity + earthquake

Material & detailing limits

02 Explore design options

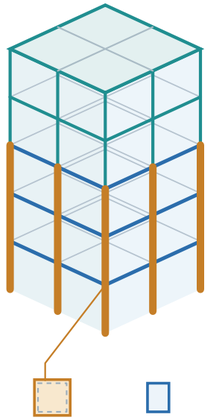

A Starting option

Column Beam

Column	24 × 24
Beam	18 × 24
Concrete	5 ksi

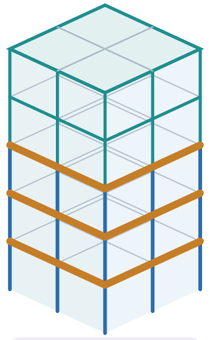

B Wider columns

Column Beam

Column	30 × 30
Beam	18 × 24
Concrete	5 ksi

C Deeper beams

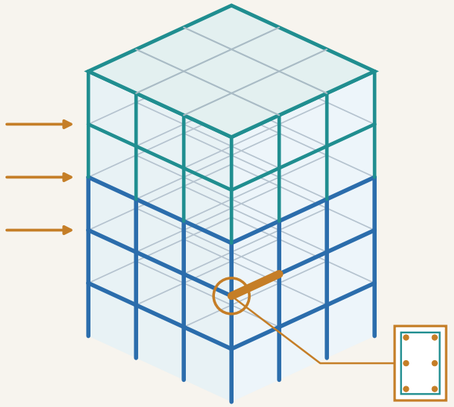

+ stronger concrete

Column Beam

Column	24 × 24
Beam	18 × 30
Concrete	6 ksi

Illustrative lower-story sizes in inches; concrete strength in ksi.

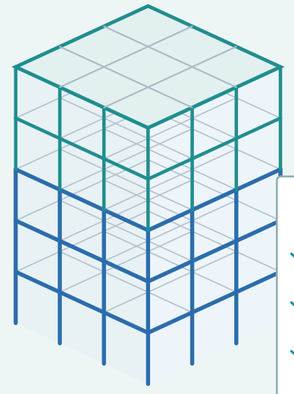

03 Test & diagnose

Locate governing weaknesses

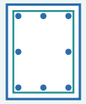

- Member strength
- Joints & detailing
- Sway & stability

04 Verify & save
